

Mechanical protection shield for underground and above-ground corrosion prevention

Features

- Excellent impact resistance
- Resistant to high temperatures up to 100°C
- Long-life protection
- Easy to apply and coat
- Excellent chemical resistance
- Resistant to high temperatures

Onshore & Offshore

Rehabilitation and new-built pipelines

Underground and aboveground application

STOPAQ®

corrosion
prevention

STOPAQ® POLYESTER

STOPAQ® POLYESTER

UV-resistant flexible mechanical protection tape

UV-curing

- Tough, hard mechanical shield

2 mm and 1 mm thickness range

- Fast & easy to apply by hand

Resistant to high temperatures up to 100°C

- Excellent chemical, impact and weather resistance

Long potlife

- No material waste

Supplied in rolls

- Can be coated in any color by a gelcoat

Opaque color

- Safe application

Mechanical protection

- Applied over STOPAQ CZH corrosion prevention system
